

# Considerate Constructors Scheme

## New 2017 Monitors' Checklist now available

Considerate Constructors Scheme has released the new monitors checklist with some amendments. The existing checklist has been assessed at the CCS annual review to identify any areas which requires adjustments due to changes in the construction industry regulations etc.

The Chief Executive of the Scheme, Edward Hardy said: "With over 18,000 monitoring visits to sites, companies, and suppliers every year, the Scheme is the central part of instigating change to help raise standards and improve the image of the construction industry. The Scheme's monitoring Checklists are the backbone to effecting this change, and we are pleased to be introducing

greater focus on helping to address the critical issues of tackling illegal working in construction and helping to embed a culture of safety through greater adoption of the CLOCS Standard."

### Some changes include:

Section 'Care About Appearance' had three changes focusing on the external appearance of all facilities, stored materials, vehicles and plant. The external appearance of cabins and welfare facilities can have a detrimental impact on the overall project.

Section 'Respect the Community' include changes like adding cycleways, footpaths, ramps and facilities for visitors.

Section 'Secure everyone's Safety' have some new prompts added, for instance inspections, access/egress.

For the detailed description of all amendments visit Considerate Constructors Scheme website.

The new 2017 Monitors' Checklist for registered sites is now available to download, along with a version with the changes highlighted and an explanatory note.
