

Dear reader,

today also English speaking reader
We have been thinking since a long time how to present our branch building magazine for not only Polish builders.

Polish BUILDER is directed mostly to them but from time to time we want to inform others about what we are doing, what benefits can have UK building market that we are here.

It looks quite simple.

We are learning English technology and gaining the knowledge about materials which are used on this market. In the same time we have own knowledge about how some problems are resolved in Poland and in other European countries.

We as IBB have built in Poland, German, Sweden and now in UK. We are able to compare and propose some different solutions - another point of view.

The same with materials. We are builders - we never sell products if we do not ask customer for what purposes it will be used.

We propose the best in our opinion.

To produce products in low costs there is a lot of aspects like

- cost of labour
- availability of materials used for manufacturing
- knowledge and experience of staff
- many other features

For many reasons some products could be better or just in better price.

We are trying to find this materials and import on this market.

For that reason from 2006 we have organized in London Polish Building Exhibitions.

3rd edition will be in May 2008 - see details on 23rd page.

But we are also strongly interested to sell English and other products.

Today we are selling products:

- MAPEI
- IZONIL
- Stones&Tools
- etc

Soon will be more.

You are welcome to our stand F 236 ECOBUILD and FUTUREBUILD.

Enjoy reading!
